

# ESET NOD32 Antivirus 4

---

**FACT:** Surfing the web and using email is a part of our daily lives

**FACT:** Criminals know this, and are flooding the Internet with over 100,000 new attacks a day, trying to steal your identity or turn your computer into a “zombie” to launch email spam and other Internet crimes

**FACT:** Over 70 million users worldwide trust ESET to defend themselves from these attacks

ESET NOD32® Antivirus 4 is the most effective protection you can find to combat today’s huge volumes of Internet and email threats. It provides comprehensive antivirus and antispymware protection without affecting your computer’s performance.

Using advanced ThreatSense® technology, ESET NOD32 Antivirus proactively protects you from new attacks, even during the critical first hours when other vendors’ products aren’t aware the attack even exists. ESET NOD32 Antivirus detects and disables both known and unknown viruses, trojans, worms, adware, spyware, rootkits and other Internet threats.

ESET NOD32 Antivirus is also one of the fastest antivirus solutions, so fast you won’t even notice it running. And it’s both incredibly easy to use yet simple to tailor for your specific needs.

## KEY BENEFITS

---

### Protection from the Unknown

Award-winning ThreatSense technology uses multiple layers of threat detection to deliver the most effective protection possible against new attacks. And ThreatSense is smart; it raises far fewer annoying “false alarms” than any other products that use heuristics.

---

### Finds Malware Other AV Companies Missed

Typically when a new copy of ESET NOD32 replaces another antivirus product on a home computer the average user finds viruses or malware resident on the machine that were undetected by their previous antivirus product.

---

### Built for Speed

ESET NOD32 Antivirus is lightning fast, so fast you won’t even notice it’s there. Even disk-intensive operations like performing a “full disk scan” run smoothly in the background while you work.

---

### Easy on Your System

ESET NOD32 Antivirus is “lean and mean,” typically using just 44MB of memory, a fraction of what other products consume. Because it’s fast and “light,” upgrading your existing antivirus protection to ESET NOD32 Antivirus can literally be like buying a new computer. And the new automatic energy-sipping battery mode lets you work or play longer.

---

### Easy on You

ESET NOD32 Antivirus is easier to use than ever before. From its compact and intuitive user interface to its minimal use of alerts, you’ll be up and running in a snap.

---

## WHAT'S NEW

---

### Smarter Scanner

Threats don't always enter in ways you expect. ESET NOD32 Antivirus inspects SSL-encrypted communication channels like HTTPS and POP3S and intelligently scans compressed files to find threats that other products miss.

---

### Clean and Safe Email

Email scanning for Microsoft Outlook, Outlook Express, Mozilla Thunderbird, Windows Live Mail, Windows Mail, and other POP3/IMAP mail clients ensures your email is free of viruses and other threats.

---

### Removable Media Security

Threats can enter your PC from removable media such as USB thumb drives. For self-running media, ESET NOD32 Antivirus scans AUTORUN.INF and associated files when the medium is inserted, in addition to scanning any file on any removable device when it is accessed, or during a full scan of the media. Power users can adjust ESET NOD32 Antivirus to perform additional levels of scanning on removable media.

---

### System Tools

ESET SysInspector™ and ESET SysRescue simplify diagnosing and cleaning of infected systems by allowing deep scans of system processes to find hidden threats, and creating bootable rescue CD/DVD or USB drives to help you repair an infected computer.

---

### Self Defense

ESET NOD32 Antivirus has built-in technology to prevent malicious software from corrupting or disabling it, so you can rest assured your system is always protected.

### Usability Improvements

ESET NOD32 Antivirus has numerous speed, security and usability upgrades.

- Energy-sipping battery mode extends laptop battery life without compromising security
  - Advanced Protection Status screen informs you of threat detections
  - Information pop-ups are hidden when running full screen applications like games, video players or presentations
  - Password protection prevents ESET NOD32 Antivirus from being uninstalled by strangers
  - New interface and keyboard shortcuts simplify use for visually impaired users
- 

### System Requirements

|                                   |  |
|-----------------------------------|--|
| <b>Processors supported:</b>      | Intel or AMD x86 / x64   |
| <b>Operating Systems:</b>         | Microsoft Windows 2000<br>Microsoft Windows XP (32- and 64-bit editions)<br>Microsoft Windows Vista (32- and 64-bit editions)<br>Microsoft Windows 7 (32- and 64-bit editions) |
| <b>Memory:</b>                    | 44 MB  |
| <b>Disk Space (download):</b>     | 28 MB  |
| <b>Disk Space (installation):</b> | 35 MB  |
