# BATTERY SAFETY GUIDELINES

**ALWAYS**

Take care to fit your batteries correctly, observing the plus and minus marks on the battery and appliance. Incorrect fitting can cause leakage or, in extreme cases, fire or even an explosion.

**ALWAYS**

Replace the whole set of batteries at one time, taking care not to mix old and new batteries or batteries of different types, since this can result in leakage or, in extreme cases, fire or even an explosion.

**ALWAYS**

Store unused batteries in their packaging and away from metal objects which may cause a short-circuit resulting in leakage or, in extreme cases, fire or even an explosion.

**ALWAYS**

Remove dead batteries from equipment and all batteries from equipment you know you are not going to use for a long time. Otherwise the batteries may leak and cause damage.

**NEVER**

Never dispose of batteries in fire as this can cause them to explode. Please put dead batteries in with the normal household waste.

**ALWAYS USE THE BATTERIES RECOMMENDED, AND NEVER MIX BATTERIES OF DIFFERENT TYPES.  
CONSUMER HELPLINE TELEPHONE NUMBER 01789 299942**

**NEVER**

Never attempt to recharge ordinary batteries, either in a charger or by applying heat to them. They may leak, cause fire or even explode. There are special rechargeable batteries which are clearly marked as such.

**ALWAYS**

Supervise children if they are replacing batteries themselves in order to ensure these guidelines are followed.

**ALWAYS**

Remember that small button cell batteries such as used in some hearing aids, toys, games and other appliances, are easily swallowed by young children and this can be dangerous.

**ALWAYS**

Keep loose button cells away from young children.

**ALWAYS**

Make sure battery compartments are secure.

**ALWAYS**

Seek medical advice if you believe a cell has been swallowed.

**ALWAYS USE THE BATTERIES RECOMMENDED, AND NEVER MIX BATTERIES OF DIFFERENT TYPES.**
