717820001IWTIE-01

HOW TO SET UP

This 14.4k modem can be configured to work with virtually any device which accepts an external 14.4k modem. It can, for example, be set to work your home PC. Please see the enclosed instruction books for how to use your modem for hardware other than game.com.

To use this modem with your game.com system, please follow these simple steps:

Turn your game.com system OFF.

Make sure the modem is OFF.

Insert the narrow plug on the electrical adapter into the “DC IN” jack on the back of the modem.

Plug the other end into an electrical socket.

Connect the cable from the Internet cartridge (available separately) into the port labeled “SER.A” on back of the modem, paying careful attention to the pattern of the pins.

Connect the other end of the cable into the "COM. PORT" on your game.com system (note: the communications port is protected by a cover which you'll need to remove).

Connect one end of the telephone cable into the phone jack on the front of the modem.

Connect the other end of the telephone cable to an active telephone line.

Turn the modem ON.

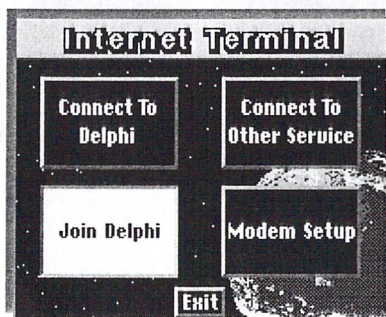

Insert the Internet cartridge into cart slot #1 on your game.com system.

Turn game.com ON.

Select CARTRIDGE from the main menu.

From the cart menu, choose what you want to do: you can subscribe to Delphi, the recommended Internet Service Provider for game.com; you can access your Delphi account if you're already a subscriber; you can access your account with another ISP which supports the text-based services compatible with game.com; or you can configure your modem, if necessary. For further information about these options, please refer to the instructions which came with your Internet cartridge. Please note that this Tiger modem should require no special configuration to work with game.com.

You're wired and ready to go!
