game.com™ Modem

This 14.4K modem lets you use your game.com system to send and receive email to ANY email address in the world. You can also browse the Web (note: access is text-based only; game.com can't process Internet-related graphics files).

Also required (not included):

- game.com Internet cartridge
- Subscription to an appropriate Internet Service Provider (subscription info included with the Internet cart)
- game.com system

game.com makes getting connected simple:

1. Insert the game.com Internet cart into slot 1 on your game.com system (cartridge sold separately).

2. Plug one end of the cable that comes with the Internet cart into game.com's communications port. Plug the other end into this 14.4K modem.

3. Connect this modem to your telephone line.

4. You're wired and ready to surf! (Subscription to an appropriate Internet Service Provider is required; please see details that come with the Internet cart, which is sold separately.)
