

SUPERVISIONTM

BALLOON FIGHT

ENGLISH

I. GAME DESCRIPTION

Have you experienced a traffic jam? If you did experience a traffic jam, you must support the act of the King of balloon. Some birds are destroying the transportation by breaking balloons. The King of balloon thus order the Oldie Camel to fight against these birds and solve the traffic problem.

II. GETTING STARTED

After the power is turned on, the logo and the title screen will be shown. Press the START key then to start the game at level one.

III. HOW TO PLAY

During the game, use A or B key to control the upward movements of Oldie Camel and use the LEFT and RIGHT keys to control his horizontal movements. Your goal is to break the birds' balloons by stepping on top of their balloons. The game consists of sixteen levels in total. Aero-plaforms, pointed poles and smoke outlets will appear in the game. The smoke outlet would eject hot air and thus causes tremendous changes in air current, this makes it harder to control Oldie Camel's movements in mid-air. The pointed poles, on the other hand is lethal enough to kill Oldie Camel, should it falls onto these pointed poles. From time to time, you may take a break during fight by staying in the platform provided. However, reflective action will be elicited at times, making it difficult to control Oldie Camel's movement.

Three lives are given initially. The game playing screen will show you on the top left corner, the number of lives left, the time limits and the scores. The game will be over if all three lives are killed.

IV. SCORING

1. Scores 150 points for breaking a balloon.
2. If the assignment is completed within two minutes, 10,000 points will be added.
3. Bonus will be given for completion of assignment before the time limit is exhausted. 200 points will be awarded for each second left and 2,000 points will be given for each minute left.

V. KEY ASSIGNMENT

<u>KEYS</u>	<u>FUNCTIONS</u>
A or B	Move Oldie Camel upwards
START	Start/pause the game
