

SUPERVISION™

DELTA HERO

I. GAME INTRODUCTION

This is a maze, adventure game. Many years ago, a beautiful country lost all the money suddenly. It could be the poisonous spider's doing. Wei-Wei, our hero, took the mission to recover the money. It is up to you to determine whether he can be successful.

II. GETTING STARTED

After the SUPERVISION logo is displayed, the game title screen will be shown. Press START will take you to an option screen where you can either select the PLAY option to start a new game. Or you may select the EXPLAIN option which will give a brief description of the game. Use the SELECT key to move the money-bag pointer to select these two options. Press START to confirm your choice.

In the actual game play, you can move Wei-Wei with DIRECTION keys. When enemies are approaching, press A-key to fire and kill them. The LIFE FORCE at the bottom screen indicates Wei-Wei's health status. This LIFE FORCE will be reduced slowly, but if Wei-Wei are caught, LIFE FORCE will be reduced more rapidly and our hero will die when the LIFE FORCE is zero. You will discover many treasures in this adventure, you should collect these treasures by pressing the B-key when Wei-Wei is walking over them. Most treasures will reward Wei-Wei with extra LIFE FORCE points when collected. You may pause the game by pressing START to note the number of bags of money taken so far. When all bags of money have been collected, you may enter the TAIJI area and exit from this game area. If you have not yet recovered all the money bags required to pass an area, you can not exit from the current area even though you may have found the TAIJI.

III. GAME DETAILS

There are a total of 5 areas in this game. In each of the areas, your objective is to take all the bags of money, avoid or kill the enemies, and find the secret exit, so that you can go to next area. There are 9 bags of money in the first three areas and 12 in the last two. You must recover every bag of money before you can exit an area. If you run into the poisonous spider, you will be poisoned. You must take the antidote quickly, since your life-force will be reduced fast. To pause a game in progress, press the START key. When a game is paused, the current area you are in, the number of bags of money and whether you are poisoned will be displayed.

You will have two chances in each area. If you fail to enter the next area with these two chances, the game is over.

IV. KEY ASSIGNMENTS

DIRECTION keys	----- Moves Wei-Wei in the required direction
A-key	----- To shoot
