

SUPERVISION™

GRAND PRIX

ENGLISH

GAME DESCRIPTION

This is a car racing game. You are embarking on an intense and exciting competition in a rough, winding road. Each country has its own unique route for the racing championship to take place.

GETTING STARTED

There are 8 races in the game and each race represents one country. You and other cars are in the same race during the competition. To qualify the entry to the next race in another country, you must rank number 1 in the current race.

Press the START key when the title screen is displayed. This will take you onto the first race course staged in China. The course is displayed temporarily, followed by the ready-to-go screen where the count down from 3 will begin. After this count down which denotes the beginning of the race, you need to press the A-KEY to start your car, and continue pressing it to increase or keep the car's present speed. And you can get a higher speed when you press the UP key as well. You should watch out for any bending corners ahead and press the appropriate LEFT or RIGHT key to manoeuvre your car. Do not drive round corners at high speed, otherwise you will drive over road marks and your car will be out of control.

If you drive badly you will not be qualify to continue the next race which is staged in another country. However when the TRY-AGAIN screen is displayed you may have another attempt in the current race. Press the START key will put you onto the race for another attempt. A summary of key and key functions is given in the section below.
