

QUADRAMTM INAUGURATES THE MERGER OF APPLE AND IBM

Use Apple software in your IBM PC and XT

Who said you can't mix Apples and IBMs? Innovation by Quadram makes it possible with QuadlinkTM. A simulated Apple computer on a revolutionary new enhancement board. With Quadlink use Apple software in IBM Personal Computers and XTs.

That means most programs designed for the Apple II, Apple II Plus or Apple IIe --including all the educational software and games -- are now compatible with the IBM PC. IBM's sophisticated business capabilities and Apple's educational and entertainment options both in one computer with Quadlink by Quadram.

Easy to use

Quadlink is a board that plugs inside the IBM PC. After it's installed, you're in business. It's like having an Apple 64K computer inside your IBM.

Don't convert or re-format any diskettes. Load the Apple software into the IBM PC and key in one command. That puts you in the Apple

mode. And you're ready to go. When ready to switch back, just press a different key. It's that simple.

Keep the extras

Of course, Quadlink allows use of all IBM enhancements while running Apple software. That means printers, buffers, monitors and more.

When using a monitor with Quadlink there's no plugging and unplugging cables. And Apple programs will appear on an IBM Monochrome or color monitor just as clearly as on Apple's own screen. Even while working with Apple's high resolution color graphics, quality won't be diminished.

Explore your options

Quadlink, essentially a simulated Apple computer, comes standard with 64K memory. Requiring only one expansion slot, it offers a parallel port designed to operate most printers and parallel devices. A serial port for connecting modems, printers and other serial accessories. And a game port for a variety of entertainment options. And

it's both IBM and Apple compatible. There's nothing like Quadlink. And nothing like reliable Quadram Quality to stand behind it.

Beyond the limits

Quadlink by Quadram opens a whole new world of possibilities for IBM PC owners. There's no reason for software limitations any longer. If you like what IBM has to offer but hesitate to give up Apple's educational programs or games, explore Quadlink. And get the best of both worlds.

Quadram Corporation is a division of Intelligent Systems, for over a decade an innovator in personal computer enhancements and color graphics computer peripherals. Quadram products are available only at authorized dealers worldwide.

Visit one and ask for a demonstration of Quadlink by Quadram. Check on our other enhancements too, including Quadboard, the original multifunction board for the IBM PC. We think you'll like what we've discovered.
