

QUADRAM™ INAUGURATES THE

Use Apple software in your IBM PC and XT

Who said you can't mix Apples and IBMs? Innovation by Quadram makes it possible with Quadlink™. A simulated Apple computer on a revolutionary new enhancement board.

Most programs designed for the Apple II, II Plus or IIe -- including educational software and entertainment options -- are now

compatible with IBM PC's sophisticated business capabilities. That's right. An Apple and an IBM. In one computer with no software limitations. Quadlink by Quadram opens a whole new world of possibilities.

Easy to use

Quadlink plugs inside IBM PCs. No conversion or reformatting of diskettes needed. Just load Apple software in the IBM and key one

command. That puts you in the Apple mode. When ready to switch back, just press a different key. It's that simple. Like having an Apple 64K computer inside your IBM.

Keep the extras

Quadlink allows use of all IBM enhancements while running Apple software. Printers, buffers, monitors and more.

MERGER OF APPLE AND IBM

When using a monitor there's no plugging or unplugging cables. Apple programs will appear on an IBM monochrome or color monitor, like Quadram's vivid RGB color monitor Quadchrome, more clearly than Apple's own screen -- even while working with Apple's high resolution color graphics.

Explore your options

Quadlink comes standard with 64K memory. Requiring only one

expansion slot, it offers a parallel port designed to operate most printers and parallel devices. A serial port for connecting modems, printers and other serial accessories. And a game port for a variety of entertainment options. There's nothing like Quadlink. And nothing like reliable Quadram Quality to stand behind it.

Quadram Corporation is a division of Intelligent Systems, for over a

decade an innovator in personal computer enhancements and color graphics peripherals.

Quadram products are available only through authorized dealers worldwide. Visit one and ask for a demonstration of Quadlink. Check on our other enhancements too, especially Quadboard, the original multifunction board for the IBM PC.

Priced at only \$680, we think you'll like what we've discovered.

The IBM logo is printed in blue on the inner forearm of a left hand, which is reaching out from the left side of the frame. The hand is open, palm facing up, and the fingers are slightly spread.The Apple logo, featuring a rainbow-colored apple with a bite taken out of it, is printed on the inner forearm of a right hand, which is reaching out from the right side of the frame. The hand is open, palm facing up, and the fingers are slightly spread. The word "apple" is written in its signature font to the right of the logo.

QUADRAM
CORPORATION
An Intelligent Systems Company

The Quadram logo is a stylized geometric design consisting of a square with internal lines forming a complex, symmetrical pattern that resembles a star or a flower.
