IBM

APPLE

Trackstar™ does it all. Run Apple software on your IBM PC.

Trackstar expands the capability of your IBM PC or MS-DOS compatible machine to run both MS-DOS software and Apple II, II plus, IIc, and IIe software libraries.

Trackstar has been third-party tested at 97.75% compatible with the most popular and widely used Apple II software utilizing an Apple II compatible disk drive.

This two-system capability gives a PC user the opportunity to benefit from the wealth of

educational, graphics, and game software created for the Apple II, while taking advantage of the MS-DOS environment.

A version of Trackstar for the IBM PS/2 models 25 and 30 is also available.

With Apple and IBM in your corner, you can go the distance. What a winning combination!
