

FEATURES

- * **Dual 65C02 Microprocessors:** The same microprocessors as used in the Apple IIc and Apple IIe Enhanced computers. Full instruction set compatibility.
- * **128K On Board Memory:** Room for all Apple software. Not limited to 64K as previous emulators.
- * **Full Apple Graphics Emulation:** Apple LoRes, HiRes, and Double High Resolution Graphics are standard.
- * **Configurable as a 1 to 4 drive Apple system:** Load and Store Apple software using an Apple or compatible drive connected to the provided port. Also uses the PS/2's drives to Save and Load Apple software.
- * **A New Concept, TrackStore:** Using our TrackStore feature, you can store Apple data and programs on any MS-DOS disk. Store the contents of two Apple diskettes on a 3.5" diskette and many Apple diskettes on a hard drive. Reduce or eliminate diskette handling.
- * **Special ProDOS Support:** Utilize the ability of ProDOS to support large disk volumes. Add two ProDOS volumes of any size to your MS-DOS hard disk system. Boot AppleWorks and other ProDOS programs without recourse to floppy media.
- * **Network Support:** Keep educational and business programs accessible to everyone. Apple software and data may be stored on a file server and retrieved over any MS-DOS compatible network.
- * **Apple Disk Drive Port:** Connect an Apple or Apple compatible disk drive directly to the TRACKSTAR Plus to load Apple programs. Will read copy protected as well as non-copy protected software.
- * **Printer Support:** Use your existing printer with Apple software. Apple programs will use your printer as if it were connected to a standard Apple serial or parallel port.
- * **Apple Joystick Port:** Connector for an Apple IIc Joystick is built in. No need to use keyboard controls for your favorite games or educational programs.
- * **Monitor Support:** Use the standard integrated or free standing color (8513001) or monochrome (8503001) IBM monitors.
- * **File Transfer:** Move data between MS-DOS and Apple formats with the supplied File Transfer Utilities. Transfer text or binary files including spreadsheet or database files.
- * **Softswitch Between MS-DOS and Apple:** Pressing ALT & ESC instantly switches between Apple and MS-DOS programs. View a result in LOTUS 1-2-3 and enter it directly into AppleWorks. Both programs continue to run simultaneously!
