

The only computer that graduates with the student.

The Apple II[™] and IBM[®] compatible WPC Bridge[™].

Most schools begin using computers with simple, visual Apple[®] software.

Which leaves a gap between the technology used in schools, particularly primary grades, and the IBM MS-DOS[®] technology most commonly used in the upper grades and in the workplace.

Now, Cordata's WPC Bridge closes that gap by running both Apple and IBM programs without rebooting the system.

So with the WPC Bridge, students can master Apple II[®] programs and graduate to IBM MS-DOS quickly and easily.

The WPC Bridge is also a powerful IBM compatible able to run MS-DOS programs at 4.77 and at 8 MHz turbo speed.

Built-in CGA and AT&T 6300[™] graphics offer outstanding resolution. And the WPC Bridge includes 512KB RAM memory, three expansion slots plus serial and

parallel ports. An optional 20MB hard drive, and 8087 math co-processor and a vast array of peripherals expand the WPC Bridge capabilities even further.

The WPC Bridge is also built to last. It has a rugged steel frame and all-in-one construction that can take the roughest usage. There are no monitors or peripherals to connect, and no messy wires or cables.

Not only is the WPC Bridge unique, it gives you outstanding quality and value.

The WPC Bridge from Cordata is the only computer smart enough to graduate.

Call us today for the dealer nearest you and ask about our all-new color model. Make sure your students get the Cordata advantage.
